- SAP-Cloud Integration

PROJECTS

Modelling and Manufacturing of Beam Engine by Using CNC Machine 2022-2023

Andhra Loyola Institute of Engineering and Technology, Vijayawada

- Led a team of 5 to design and manufacture a beam engine using CNC machining techniques.
- Utilized Nx-cam for simulation and modelling of the engine components.
- Successfully completed the project within the stipulated time frame, enhancing team collaboration and technical skills

Online Job-By Website (mini-project | React | Redux | Node.js | RESTful APIs) 2023-2024

- **Description:** Our project aims to develop a responsive, full stack job searching for job searching platform that allows users for searching jobs and save jobs
- **Frontend:** Built the UI with React and Redux to manage application state efficiently. Used React Router for seamless page navigation and created dynamic, reusable components to enhance user experience.

- **Backend:** Designed RESTful APIs with Node.js and Express to handle user authentication, job data management, and job application submissions. Used JWT for secure user sessions.
 - **Database:** Stored job listings and user information in MongoDB, allowing for efficient querying and data handling.
- **Key Features:**
- Real-time job search with filters based on job title, location, and keywords.
 - User authentication and authorization for secure profile and application management.
 - Job bookmark and save feature, allowing users to track applications.
 - Admin dashboard for job listing management, user stats, and platform analytics
